# 2010

## Year of Establishment

---

Established in 2010, "ArtBudService" has become a leading provider of construction services in Ukraine.

We have our own strong design and manufacturing capabilities and highly skilled experts with vast knowledge and experience in modern design, construction and management. This ensures minimal involvement of subcontractors as well as quick and efficient delivery of Client's tasks.

# 11

## Company Offers

---

1. Turnkey implementation of a full range of construction works;
2. in-house implementation of most project tasks, with partial involvement of reliable subcontractors;
3. Optimized design solutions;
4. Advanced construction technologies;
5. Reliable suppliers of building materials and equipment;
6. Rational use of customer's funds;
7. Strict adherence to schedules and agreed deadlines;
8. Professional registration of construction-related documentation;
9. High quality of work;
10. Compliance with customer requirements and technical regulations;
11. Warranty for delivered projects.

## WHAT WE DO

ArtBudService company specializes in the construction of objects of various complexity and functional purpose. We carry out professional management of projects in the field of industrial, commercial and civil engineering. No matter what the task for the ArtBudService team is - whether it is the construction of new facilities or the reconstruction of existing buildings and structures - we always assume all construction risks and guarantee the highest quality of works execution.

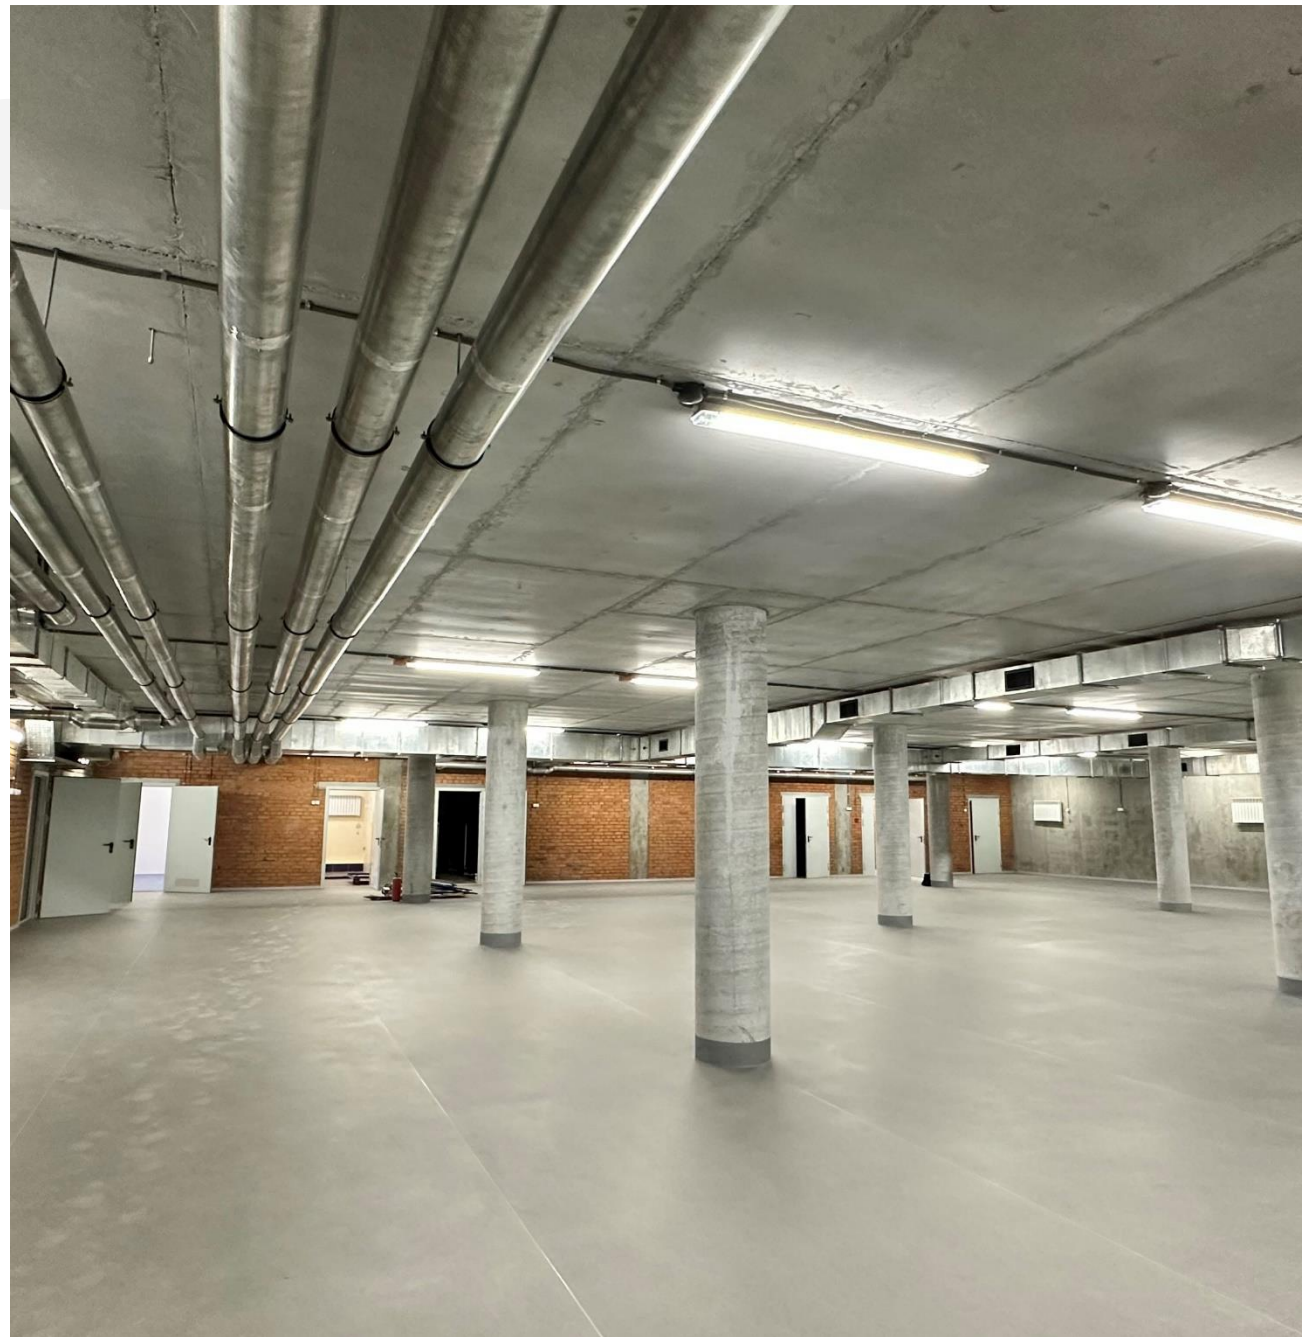

EXPERIENCE

COMPLITED  
PROJECTS

GUARANTEED  
QUALITY

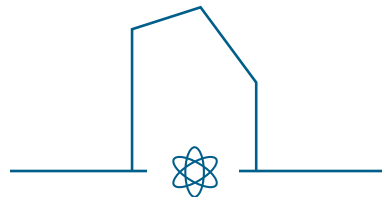

WE CREATE FAVORABLE CONDITIONS FOR ALL WORKING-PROCESS PARTICIPANTS AND BELIEVE THAT OUR SOCIABILITY AND COMPETENCE ALLOWS CREATING HIGH-QUALITY FACILITIES OF THE FUTURE

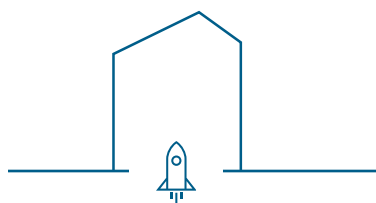

RESPECT FOR EVERYONE

WE KNOW THAT TOTAL COMPANY'S SUCCESS DEPENDS ON EFFORTS AND WORK OF EVERY WORKING PROCESS PARTICIPANT. THAT IS EXACTLY WHY WE CREATE THE MOST FAVORABLE CONDITIONS FOR MUTUAL COOPERATION OF ALL PARTIES AND BY DOING SO GUARANTEE THE MOST EFFICIENT TASK SOLUTIONS FOR THE CLIENTS.

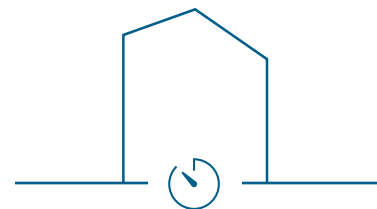

INNOVATION

ARTBUDSERVICE COMPANY PAYS CONSIDERABLE ATTENTION TO INTRODUCTION OF THE NEWEST TECHNOLOGIES BOTH IN CONSTRUCTION AND IN MANAGEMENT. CONVENTIONALITIES ARE NOT FOR US. WE ARE OPEN TO NEW OPPORTUNITIES, WHICH ALLOW US TO SOLVE THE ASSIGNED TASKS MORE EFFICIENTLY AND RATIONALLY.

INITIATIVE

IN OUR WORK WE ARE ALWAYS ORIENTED TO THE TARGETS AGREED WITH THE CUSTOMER AND ACT IN ACCORDANCE WITH AGREED PROJECT TERMS.

RESULTS-DRIVEN APPROACH

WE LOVE OUR WORK AND THEREFORE WE ARE EXCITED TO UNDERTAKE NEW PROJECTS OF ANY COMPLEXITY. OUR COMPANY IS ALWAYS INTERESTED IN ACHIEVING RESULTS, WHICH SATISFY CLIENTS' EXPECTATIONS BY 100 %.

ACCOUNTABILITY

EACH INDIVIDUAL PROJECT CONFIRMS OUR PROFESSIONAL COMPETENCE. WE APPRECIATE OUR WORK AND REPUTATION, AND THEREFORE ALWAYS ASSUME RESPONSIBILITY FOR THE QUALITY OF WORKS EXECUTED.

# International aid projects for housing reconstruction

Based on an assessment of household needs and in accordance with the limits set by international humanitarian aid programs, windows, doors, and plumbing fixtures were replaced, and repairs were made to roofs, ceilings, walls, and floors.

## Project Details:

TOTAL AREA:	2,000 housing units and 2 dormitories
CUSTOMER:	Save the children, NRC, IOM, Catitas-Spes, DRC
BENEFICIARY:	Department of Education of Borodianka Village Council
TYPE OF WORK:	Repair work
TERM:	2022-2026
REGION:	Chernihiv, Kharkiv, Sumy, Donetsk, Dnipropetrovsk, Mykolaiv, and Kherson regions

As a result of the occupier's full-scale invasion of Ukraine in early 2022, the civilian population is suffering. Homes in frontline towns and cities are subject to regular artillery and rocket fire. Even if a building survives, blast waves shatter windows and doors, and rocket debris damages roofs and walls.

Thanks to the assistance of international humanitarian organizations, partial repairs have been carried out to enable more than 2,000 families in various regions of Ukraine to continue living in their homes and dormitories.

# Renovation of 5 educational facilities in Chernihiv region

The project to renovate educational institutions was implemented as part of the restoration of the educational infrastructure in Chernihiv Oblast

## Project Details:

TOTAL AREA:	5 000 m <sup>2</sup>
CUSTOMER:	UNICEF
TYPE OF WORK:	Reconstruction works
TERM:	2025
REGION:	Chernihiv Oblast

Because of the damage to educational infrastructure and the need to ensure a safe learning environment, five schools with a total area of 5,000 m<sup>2</sup> were renovated.

The project was carried out as a turnkey contract, providing a full range of construction, installation, and engineering solutions.

A range of general construction works was performed: repair and insulation of the roof and facade, replacement of windows and doors, as well as concrete, masonry, and cladding work. Engineering systems for water supply, sewerage, electricity, lighting, and heating were installed.

# Renovation works at Mykolaiv Gymnasium №10

As part of the restoration and modernization of the educational infrastructure, a range of repair works has been completed

## Project Details:

TOTAL AREA:	3 258 m <sup>2</sup>
CUSTOMER:	German Society for International Cooperation (GIZ) GmbH
TYPE OF WORK:	Repair work
TERM:	2024 - 2025
REGION:	Mykolaiv

The project aims to create a stable and functional environment for students and teachers that complies with current building codes and safety standards.

Repairs and restoration of the building's structural elements were carried out, along with interior finishing work and the renewal of floor coverings and building envelopes.

Modernization of internal utility networks, ensuring the stable operation of electrical, water supply, and heating systems.

ПРОЕКТИ

# Major renovation of the bomb shelter at the Odessa Regional Clinical Hospital

The project aims to create a modern, safe, and fully functional shelter for the hospital's patients and medical staff

## Project Details:

TOTAL AREA:	453 м2
CUSTOMER:	Representative Office of the International Medical Corps in Ukraine (IMC)
TYPE OF WORK:	Major renovation
TERM:	Completed in June 2024
REGION:	Odessa

As a result of the project, the facility was brought into compliance with civil defense requirements and adapted to ensure people's comfort during emergencies.

The team carried out a range of construction and engineering works: installation of partitions, interior finishing, installation of plumbing fixtures, as well as the installation of internal water and electrical supply systems, lighting, heating, and ventilation.

# Golden Tile Plant Construction

Construction of a complex for magnetic enrichment of feldspar charge by wet method for one of the largest manufacturers of these products in Eastern Europe. The capacity is 100 thousand tons per year.

## Деталі проекту:

TOTAL AREA:	5 113 m <sup>2</sup>
CUSTOMER:	MAIDAN-VILSKY QUARRY LLC
TYPE OF WORK:	General contracting
TERM:	1 stage: 2022-2023, 2 stage: 2023-2024
REGION:	Khmelnitsk oblast, Polonne region, Navaki village
PLOT AREA:	11,24 hectares

Our company carried out the design of all complexes, construction, as well as installation of technological equipment.

This is a unique complex for the production of raw materials for the manufacture of ceramics and porcelain, and for the future - for the production of glass.

The construction project provides for separate buildings: a raw material beneficiation workshop, 2 warehouses for finished products and a raw material drying workshop, pools for sludge of solid particles from process water, treatment facilities, wells and reservoirs for fire-fighting water supply, etc.

# Renovation of the facilities of furniture component manufacturer VIYAR

The reconstruction allowed to increase the productivity and safety of the complex and create modern working conditions for the staff.

## Project Details:

TOTAL AREA:	15 000 м2
CUSTOMER:	ViYar (DNM-REALTY LLC)
TYPE OF WORK:	Reconstruction
TERM:	Completed in december 2023
REGION:	Vasylkiv, Kyiv Oblast

As part of the second phase of construction, the production and storage building (Building No. 102) and staff facilities were renovated, and a boiler room and Overpass №1 were constructed, along with the installation of external utility networks.

Reinforcement of reinforced concrete structures, modernization of power supply, heating, and ventilation systems, as well as the implementation of modern water supply, sewerage, and fire safety systems were carried out.

The completed work has increased the complex's operational efficiency, ensured the stable operation of engineering systems, and brought the facility into compliance with modern technical and safety standards.

# Construction of a bomb shelter (anti-radiation shelter)

This is the first bomb shelter newly built with direct financing by international partners as part of the reconstruction of social infrastructure in Ukraine

## Project Details:

TOTAL AREA:	1 300 m <sup>2</sup>
CUSTOMER:	Central Project Management Agency (Government of Lithuania)
BENEFICIARY:	Department of Education of Borodianka Village Council
TYPE OF WORK:	Contract for the construction of a bomb shelter and an extension
TERM:	March-September 2023
REGION:	Borodyanka, Kyiv region

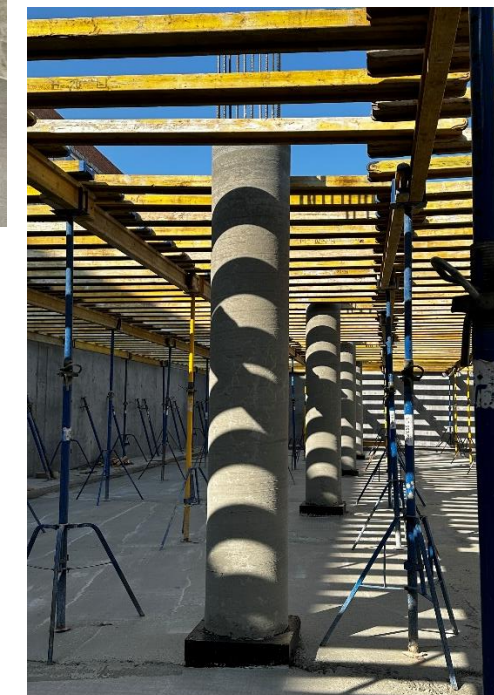

During the hostilities in the region and the occupation of the village, the Borodianka Lyceum suffered serious destruction and significant damage, all property in the educational institution was completely destroyed, mutilated and looted by the Russian army. The Government of Lithuania joined the restoration of this school.

Our company has built a modern radiation shelter for 700 people for the opportunity to study at the Lyceum.

The following works were performed: earthworks and monolithic works, installation of all internal engineering networks, interior decoration.

There was also built an extension building with additional classrooms and the installation of an elevator to allow students and teachers with disabilities to quickly descend into the bomb shelter to ensure inclusiveness.

# Reconstruction of Hostomel Ambulatory

## Project Details:

TOTAL AREA:	1 200 м <sup>2</sup>
CUSTOMER:	International Medical Corps
TYPE OF WORK:	General contracting
TERM:	November 2022-February 2023
REGION:	Hostomel, Kyiv region
PLOT AREA:	9,54 ra

As part of the international humanitarian aid project from the International Medical Corps, the company overhauled the Hostomel Outpatient Clinic:

- Complete reInternationalplacement of the roof with metal tiles with reinforcement of the structural part of the system
- Replacement of the heating system in the outpatient clinic and 2 gas boilers, boiler rooms
- Partial replacement of the sewerage and drainage system and installation of new bathrooms in compliance with inclusive requirements
- Interior finishing works and replacement of cabinet doors and fire doors on escape routes

# Construction of solid fuel boiler houses

## Project Details:

TOTAL AREA:	2 000 m2 (1,000 m2 each)
CUSTOMER:	Andrushivka Butter and Cheese Factory, KAPRO OIL LLC
TYPE OF WORK:	General contracting
TERM:	2023
REGION:	Andrushivka, Zhytomyr region and Kropyvnytskyi

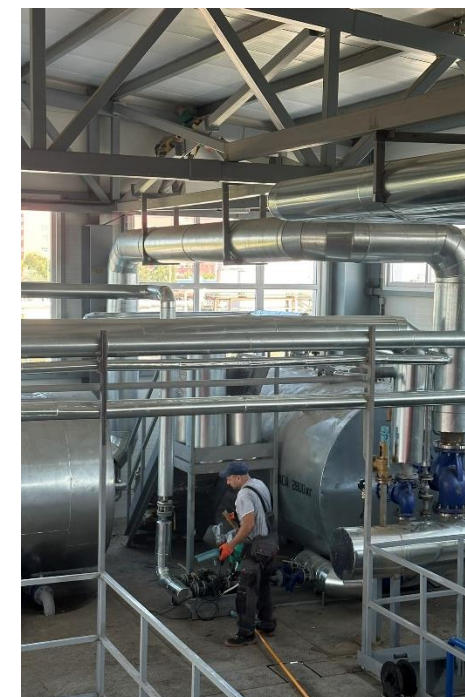

Construction of solid fuel boiler houses for the food industry to provide alternative energy supply to factories.

Andrushivka Butter and Cheese Plant (Andrushivka village, Zhytomyr region) is one of the largest producers of high-quality cheese and traditional Ukrainian butter.

The company KAPRO OIL LLC (Kropyvnytskyi) specializes in the production of vegetable fats and oils, with a capacity of 300 tons of finished products per day.

Our company has implemented the construction of 2 new three-fuel boiler houses for these customers.

# Construction of residential houses Park Side in Lviv

A modern European town, designed according to the best world standards

## Project Details:

TOTAL AREA:	16 000 m <sup>2</sup>
CUSTOMER:	M7 Development
TYPE OF WORK:	Contract for monolithic works
TERM:	2022-2023
REGION:	Basivka village, Lviv, Kiltseva road
PLOT AREA:	87 ha

The Parkside residential complex consists of 87 hectares of territory, 40 residential buildings with a height of 4-6 floors and unique infrastructure. It has no analogues in Ukraine. It is being built on the Lviv ring road, 10 km from the center of Lviv. The construction period is 15 years.

The architect of the project is O. Buga. The prototype of the complex is a modern residential area of Warsaw – Nowy Wilanów.

Our company performs a full cycle of monolithic works on the first 4 buildings of the complex (4-storey buildings).

# Logistic and warehouse complex for crop protection agents, RemTrans

## Project details:

TOTAL AREA:	12 000 m <sup>2</sup>
CUSTOMER:	LLC "LMS-TOWN"
TYPE OF WORK:	General contract
STAGE:	Finished in 2022
REGION:	Putrivka village, Kyiv region

Construction of the newest logistics complex for storage of plant protection products with a packing line is continuing.

The logistics complex with a total area of 12,000 m<sup>2</sup> is being built in Vasytkiv district of Kyiv region and will be able to store 23,000 tons of PPP at the same time. During its existence, our customer RemTrans took one of the first places in the logistics services market and significantly expanded its activities.

Our company, as a general contractor, performed a full cycle of work for the implementation of the project.

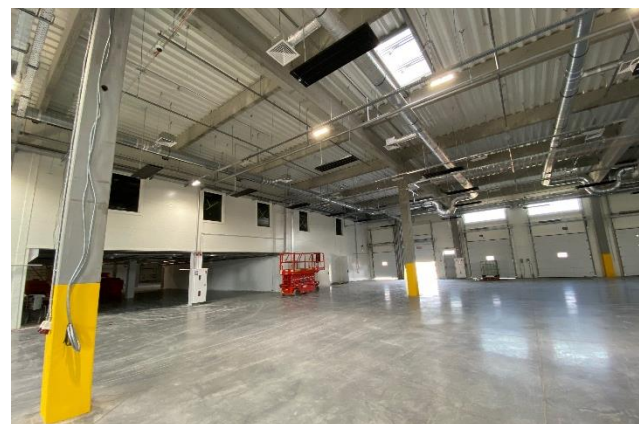

# Logistics complex

for Nova Poshta in the Bila Tserkva Industrial Park

## Project Details:

TOTAL AREA:	3 453 м <sup>2</sup>
CUSTOMER:	Bila Tserkva Industrial Park
TYPE OF WORK:	General contract
STAGE:	completed in 2021
REGION:	Bila Tserkva, Kyiv region
BUILDING AREA:	3 260 м <sup>2</sup>

Construction of a logistics automated depot for courier delivery of goods of the company "Nova Poshta". As part of the terminal: customer service department; office and social premises; infrastructure objects are attached.

# Logistics terminal for "Nova Poshta" in Mykolaiv

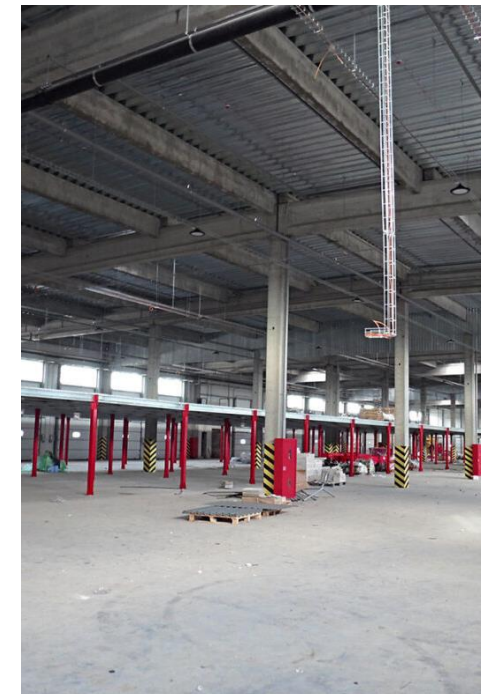

**Project details:**

TOTAL AREA:	5 217 m <sup>2</sup>
CUSTOMER:	LLC "MAKLER TOP"
TYPE OF WORK:	General contract
STAGE:	Completed in Q1 2021
REGION:	Mykolaiv

The construction of a large-scale logistics complex with an area of 5,217 m<sup>2</sup> in Mykolaiv has been completed.

Specialists of our company qualitatively built the frame, equipped the façade and roof. Now there is a terminal of the leading logistics operator of Ukraine.

# Distribution center (Malekhiv) Nestle Ukraine LLC

## Project details:

BUILDING AREA:	5 295,9 м <sup>2</sup>
CLIENT:	Nestle Ukraine LLC
TYPE OF WORK:	General contract and design
STAGE:	Completed in 2020
REGION:	Malekhiv village, Lviv region
SITE AREA:	9,54 ha

Design and construction of frame-type warehouse building for LLC "Nestle Ukraine" was carried out. The outer walls of the case are made of hinged sandwich panels with polyisocyanurate filler. Rolled-strip roof is built using PVC membrane with internal drainage, heat insulated with rigid mineral wool plates.

Exterior doors and gates – metal with heat insulation.

The fire wall between the existing and the new warehouse is made of gas blocks using adhesive solution with metal mesh reinforcement.

External doors and gates - metal with insulation. The fire wall between the current and the new composition is made of gas blocks on an adhesive solution with a metal mesh reinforcement.

The floor is made of monolithic concrete with reinforced top layer, in accordance with the sanitary and hygienic requirements for food storage.

# Kyiv Innovative Terminal

In the end of 2018 the «ArtBudService» company became the winner in the nomination "INNOVATION OF THE YEAR" according to the version of EE Real Estate Project Awards - 2018 for the project of building KIT.

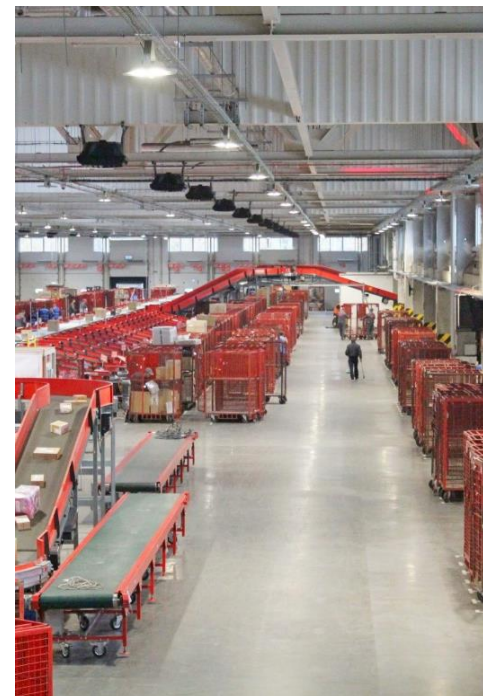

## Project details:

BUILDING AREA:	30 000 м <sup>2</sup>
CLIENT:	Interregional Service Company LLC
TYPE OF WORK:	General contract
STAGE:	The first stage completed in Q4 2017 Second stage completed in Q3 2020
REGION:	Sofiyivska Borshchagivka, Kyiv Region
SITE AREA:	9,54 ha

Kyiv Innovative Terminal is administrative and logistics complex with hulls of different designations and the most efficient sorting line in Ukraine. 300 operators serve the terminal. Due to their work with the use of one of the most sophisticated robotic sorting line by Vanderlande, the complex can sort up to 400 thousand parcels a day.

Sorting capacity of this terminal is several times higher than any other terminal in Ukraine. This construction project marked the transition of Nova Poshta to higher automation, and focus on advanced technologies and innovations.

# Production and warehouse complex

## "DKS Ukraine"

### Project details:

CUSTOMER:	PJSC "DKS Ukraine"
TYPE OF WORK:	General contract
STAGE:	Completed in 2020
REGION:	Ivankiv village, Boryspil district, Kyiv region
BUILDING AREA:	4 000 м <sup>2</sup>

Completed as a part of DKS Ukraine CJSC project to launch second production facility for electrical and data networks laying systems (PVC and polyethylene), the works included:

- erecting production and warehouse facility;
- setting up parking space for trucks and cars;
- building a storage area for double wall pipes ready for shipment.

### Scope of work:

- preparatory work;
- construction of underground and surface parts of the building;
- laying out external engineering networks incl. power supply, water supply and sewerage;
- beautification of the territory.

# Overhaul of the second Donetsk water pipeline under UNICEF project

## Project details:

TOTAL LENGTH:	550,50 м
CUSTOMER:	United Nations Children's Fund in Ukraine (UNICEF)
TYPE OF WORK:	General contract for overhaul
TERM:	Completed in 2019
REGION:	Donetsk region, Slovyansk

The second Donetsk water supply (the second thread) was put into operation in 1979. 40 years of operation of the water supply system led to a significant deterioration of its condition, which leads to frequent gusts and stops in work to eliminate currents. During major repairs, a significant part of settlements that are direct consumers are left without drinking water.

Construction and installation works, hydraulic tests were carried out, as well as a new site was cut into the existing water supply. As a result of the implementation of this project, residents of the surrounding villages and towns will be able to feel the smooth operation of the second Donetsk water supply system, due to a significant improvement in its performance.

# Warehouses and office premises of the Electronics Plant "Flextronix"

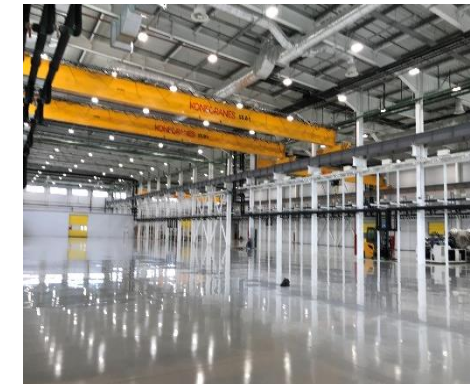

**Project details:**

CUSTOMER:	Plant "Flextronix LLC"
TYPE OF WORK:	Contract for a complex of construction works
STAGE:	Completed in 2019
REGION:	Mukachevo, Zakarpattia oblast
BUILDING AREA:	11 200 m <sup>2</sup>

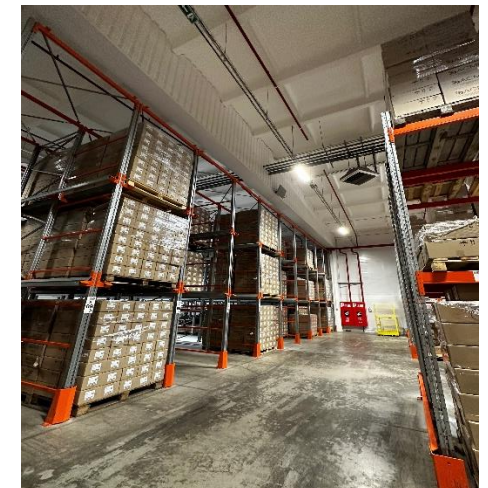

On July 10, 2018, ArtBudService signed an agreement with the American company Flextronics on the construction of the third stage of the plant, namely, the construction of a production and warehouse building with an administrative extension in Mukachevo, Transcarpathian region.

Flextronix specializes in the production of electronics, is the second company in the world in the segment of contract production of electronics and equipment and has partnerships with companies such as Alcatel-Lucent, Cisco Systems Ins, Microsoft, Xerox, Lenovo, Dell, Bose, Google, etc.

# Administrative complex and technical re-equipment of ECMI production facilities

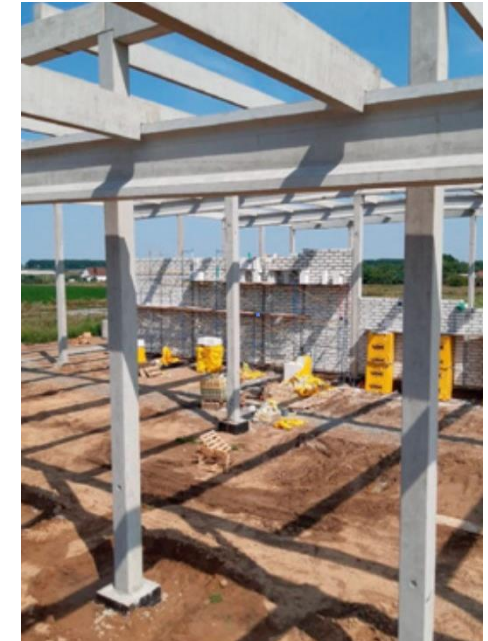

## Project Details:

TOTAL AREA:	1,45 ha
CUSTOMER:	LLC "VTF "ACME"
TYPE OF WORK:	General designer, General contract for reconstruction
STAGE:	Stage 1: Completed in 2016 Stage 2: Completed in 2019
REGION:	Ukrainka, Obukhov district, Kyiv region
BUILDING AREA:	5 320 м <sup>2</sup>

Production and trading company "ACME" is one of the largest enterprises in Ukraine, which is engaged in the production of cosmetics for hair. The company's products are developed in its own certified research laboratory, which continuously monitors raw materials and finished products for each production line.

The project provided for the overhaul of industrial and household premises, the reconstruction of a complex of engineering networks, technological systems and production automation systems for the preparation of clean products.

# Roadside service complex for servicing trucks and agricultural machinery "Eridon Tech"

**Project details:**

CUSTOMER:	Eridon Tech LLC
TYPE OF WORK:	General contract
STAGE:	Completed in 2019
REGION:	Suprunivka village, Poltava region
BUILDING AREA:	4 056 м <sup>2</sup>

At the request of Eridon Tech LLC, a leader in the supply of agricultural machinery, a roadside service complex for the maintenance of trucks and agricultural machinery was built. Completed: earthworks (for the construction of the foundations of the building and the improvement of the territory); construction of the foundations of the building - monolithic and prefabricated reinforced concrete; device of prefabricated reinforced concrete and secondary metal frame of building structures;

bricking of external and internal walls and partitions; arrangement of an industrial concrete floor with a top layer of topping; installation of anti-aircraft flue lights on the roof of the building; carrying out external engineering networks (water supply, sewerage).

# Reconstruction of the warehouse for finished products and raw materials with refrigeration chamber

Pjsc "Mondelez Ukraine"

**Project details:**

CUSTOMER:	Pjsc "Mondelez Ukraine"
TYPE OF WORK:	General designer, general contractor
STAGE:	Completed in 2019
REGION:	Trostanets, Sumy region

# John Deere agricultural equipment exhibition, sale and maintenance center

## Project details:

CUSTOMER:	LLC "RDO UKRAINE"
TYPE OF WORK:	General design, general contract
STAGE:	Completed in 2017
REGION:	Vinnitsia, Zhitomir highway
PLOT AREA:	1.78 ha
BUILDING AREA:	4 750 m <sup>2</sup>

In 2017, ArtBudService implemented the project in Vinnitsia. The list of completed works includes the design of the object, the supply and installation of engineering and technological equipment, commissioning and commissioning of the facility.

RDO UKRAINE is the official dealer of agricultural machinery John Deere and the continuation in Ukraine of the world-famous American company RDO Equipment Co.

# Extension of cookies production zone with Packing Area

Pjsc "Mondelez Ukraine"

**Project details:**

CUSTOMER:	Pjsc "Mondelez Ukraine"
TYPE OF WORK:	General designer, general contractor
STAGE:	Completed in 2017
REGION:	Trostanets, Sumy region

# Overhaul of the nursery school

under the US Government Humanitarian  
Aid Program (EUCOM)

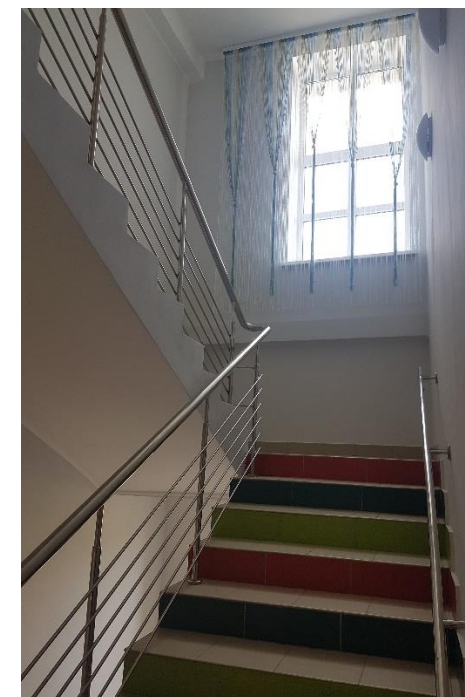

## Project details:

CUSTOMER:	U.S. Embassy
TYPE OF WORK:	General designer, general contractor
STAGE:	Completed in 2017
REGION:	Nova Hreblya village, Vinnytsia region

The renovation of the nursery school building in the village of Nova Hreblya, Vinnytsia region, was carried out under the US Government Humanitarian Aid Program (EUCOM).

The purpose of the project is to transform the old facility into a fully functioning, modern public building that meets all the requirements of the legislation of Ukraine. In accordance with the project, partial redevelopment of the building, work on interior decoration, as well as the installation of all necessary engineering networks were carried out. Insulation of the building was carried out with the use of modern energy-efficient technologies.

# Danone Baby Food Shop

On the territory of the city milk plant

**Project details:**

CUSTOMER:	PJSC "Kremenchug City Milk Plant" (DANONE)
TYPE OF WORK:	General contract
TERM:	Completed in 2015
REGION:	Kremenchuk, Poltava region
BUILDING AREA:	5 480 m <sup>2</sup>

The construction of the main production building No. 2 for the production of baby food products on the territory of the Kremenchug city milk plant allowed to process 15 thousand tons annually. Within the framework of the implementation of this project, a full range of construction and installation works was carried out, as well as the improvement of the territory.

During the construction of the facility, a number of measures aimed at achieving energy saving efficiency were applied, automated equipment was installed and its protection was provided.

# Production and storage and facilities for sewage treatment of the Trostyanets Chocolate Factory

According to the results of the work, the company received the highest rating from the employees of Kraft Foods Ukraine ("100" out of 100 points) under the internal system of evaluation of work.

## Project Details:

CUSTOMER:	PJSC "Kraft Foods Ukraine"
TYPE OF WORK:	General contract for warehouse expansion
TERM:	Stage 1: Completed in 2014 Stage 2: Completed in 2016
REGION:	Trostyanets, Sumy region
BUILDING AREA:	2 3000 м <sup>2</sup>

The new building for the production of biscuits was built as part of the expansion of the production capacity of the Trostyanets Chocolate Factory "Ukraine". The construction of a new production and warehouse of the biscuit building was carried out in two stages. To organize the technological process, the main and auxiliary production facilities were built.

The biscuit body is designed for the production of biscuits with a maximum volume of 238 tons per day and 78496.0 tons per year.

The construction of facilities for the post-treatment of the plant's sewage with a capacity of 350-480 cubic meters/day ensured the discharge of locally treated water into the city sewerage. The implementation of the project increased the efficiency of wastewater treatment and waste disposal, and reduced the consumption of reagents. The operation of facilities and equipment at the facility is fully automated.

# Reconstruction of a hostel for internally displaced persons from eastern Ukraine

as a part of the US Government's Humanitarian Aid Program (EUCOM)

**Project details:**

CUSTOMER:	U.S. Embassy
TYPE OF WORK:	General designer, general contractor
STAGE:	Completed in 2016
REGION:	Nova Hreblya village, Vinnytsia region

The project was implemented within the framework of the U.S. Government's humanitarian assistance program, which is closely monitored by the U.S. European Armed Forces Command (EUCOM). The program is aimed at improving the living conditions of the Ukrainian population, increasing the energy efficiency of buildings, as well as the use of modern materials and technologies. During the reconstruction of the hostel, capital insulation of the building was carried out, as well as parking was organized.

# Danone Baby Food Factory

On the premises of the municipal dairy

**Project details:**

CUSTOMER:	PJSC "Kremenchug City Milk Plant"
TYPE OF WORK:	Main contractor
STAGE:	Completed in 2015
REGION:	Kremenchuk, Poltava region
BUILDING AREA:	5480 м <sup>2</sup>

The construction of the main production building №2 for the manufacture of baby food on the premises of the Kremenchuk City Dairy Plant has enabled the processing of 15,000 tonnes of milk and the production of 7,400 tonnes of finished products annually. As part of this project, a full range of construction and installation works was carried out, along with landscaping of the site.

During the construction of the facility, a number of measures were implemented to achieve energy efficiency, automated equipment was installed, and provisions were made for its protection.

# The main production building of the Kremez plant for Danone

**Project details:**

CUSTOMER:	PJSC "Kremenchug City Milk Plant"
TYPE OF WORK:	Contract for the reconstruction of the main production facility No1
STAGE:	Completed in 2014
REGION:	Kremenchuk, Poltava region
PLOT AREA:	9,54 ha
BUILDING AREA:	2 730 м <sup>2</sup>

The decision to reconstruct the main production building of the Kremenchug Dairy Plant was made as part of a strategic course for the modernization of Danone Ukraine production facilities. The proposed design solutions were aimed at the introduction of progressive production methods, the main requirements of which are the quality and safety of products.

Repair work of the main complex was started with the dismantling work with the simultaneous replacement of all internal and external engineering networks.

# Ice Terminal seafood logistics center

The Ice Terminal seafood logistic center entered into the Book of Records of Ukraine in the category “Business and Technologies” as the largest and most modern refrigeration and logistics complex in Ukraine.

## Project details:

TOTAL AREA:	23 000 м <sup>2</sup>
CUSTOMER:	ICE Terminal LLC
TYPE OF WORK:	Engineering works
STAGE:	Completed in 2011
REGION:	smt. Velyka Dimerka, Kyiv region

ICE TERMINAL is one of the largest and most modern automated refrigeration and logistics complexes in Ukraine, which meets all international standards for the quality of storage of chilled and frozen products. Within the framework of the construction of the logistics center, the design and installation of engineering support systems was carried out to create an appropriate microclimate of the enterprise and the effective efficiency of workers.

Considerable attention is paid to safety when working with ammonia – a high-energy effective refrigerant. Thanks to well-thought-out design using modern innovative technologies, ammonia installations are very cost-effective, as well as safer and more convenient to operate than other refrigerants. ICE TERMINAL complex meets modern requirements for temperature, humidity, fire safety and energy efficiency.
